

VM 2 Text App

MAKE VOICEMAIL USEFUL AGAIN

"Any Scenario" voice messaging access

We are mobile people, in a mobile world, bound only by the tools we use to enhance our focus, prioritize tasks and stay connected. Votacall's VM 2 Text App strips you of these boundaries by providing simple, at a glance "Any Scenario" access to your voice messages.

What is your "Any Scenario"?

In the office and away from your desk, on the road and in need of quick access to important messages, in a meeting and cannot step out to listen to messages or out to dinner and you just don't want to be that person on the cell phone. Whatever your unique access needs are, Votacall VM 2 Text will address them.

The Simple UC App

When it comes to Unified Communications (UC), features must be as simple as they are powerful. If it is not simple, it is not useful. If it is not powerful, then what is the value? The Votacall VM 2 Text App has just the right combination of power and simplicity making staying connected actually possible.

Here is how it works....

The VM 2 Text App will transcribe audio voice messages and send the text to the destination(s) of your choice. Send the transcribed message to a mobile phone, mobile device or email address. Pick the one that works for you. If you cannot choose one, choose a combo or all of the delivery methods at no additional cost.

Powerful Functionality

People fall into 1 of 4 style categories when leaving voicemail messages. The majority of us fall into the **Clear and Concise** category, our messages are...well...clear and concise and easily transcribed into text.

The other 3 types - **The Mumble Messenger**, **The Speed Demon** and **The Message Whisperer** - are a bit more tricky. So, we simplified things by adding functionality to the App. Our service sends the transcribed message accompanied by the audio version for instant playback when necessary.

Road Warriors: When traveling, VM 2 Text will make staying connected just a click away, literally. Each VM 2 Text message includes the Caller ID information as a **"Hot Link"** for Click to Dial functionality. Forget trying to write down or memorize a phone number left in your voicemail, just read, click and connect.

Features & Benefits

- **The Simple UC App**
Anywhere & Any Scenario visual access
- **Efficient**
Receive voicemail transcriptions & the audio versions (WAV file) in one notification
- **Productive**
Just Read & React - Reduce the time spent managing voicemail
- **Respond**
Instant call back with a touch of your smartphone
- **Flexible**
Choose your weapon:
Send text or audio or both to a mobile phone, tablet, email, traditional vm - pick one, a combo or all of the above
- **Be Green**
Don't waste paper (or time) scribbling key info from messages on notepads - names and phone numbers are now visual
